

TURNKEY MOBILE NETWORKS

<http://www.turnketmobilenetworks.com>

CREATE A CELL PHONE NETWORK ANYWHERE.

ACS Wireless has brought together a team to give you the ability to create your own cell phone network virtually anywhere. Using new or refurbished equipment, we are able to provide this at a price that will allow your customers the opportunity to communicate within your own region and with the rest of the world.

Depending upon your requirements, as well as the requests of your clientele, we can engineer a system that not only will meet your needs, but also will be reasonably priced and have the ability to upgrade with increased demand.

COVER A CITY OR A WHOLE COUNTRY.

From the cell towers to the handsets, we can provide everything you need to get started. We take care of all phases of the project from the design of the network, all the way to training your employees. We can integrate with your existing equipment or build from the bottom up.

ACS can design your network with state-of-the-art data and internet, or a basic voice-only system, or anything in-between. We can set up a network on an island, in a desert, or in a remote mountainous terrain. ACS can supply you with a turnkey mobile network as big or as small as you need it to be.

TURNKEY MOBILE NETWORKS

<http://www.turnketmobilenetworks.com>

ACS Wireless, along with our partners, can provide you and your customers either a standalone cell phone network or integrate our equipment with an existing private or government communications network. Our goal is to be able to give you a turnkey business that you will be able to start with minimal effort on your part. We can provide you with any or all of the following services.

- Complete installation of cell phone infrastructure equipment from Base Station to outlying stations (Base Transceiver Station) and link them together with microwave transmitters capable of transmitting in the harshest of environments.
- Provide a variety of Antenna options, from directional to omni-directional or both.
- Supply various options for connecting your system to the Public Telephone Switch Network (PTSN) from VoIP, to satellite, to land line.
- Provide you with generators or link in with the local power supply., for areas around the world with unstable power grids.
- Supply you with low cost handsets already paired with the proper SIM card to allow you to input new customers quickly and easily.
- Provide you with spare boards and other equipment to allow you to have minimal downtime in case of any of the components failing or breaking.
- Train your employees to deal with issues with the system and to input new customers into your network.
- Connect you with the global GSM network to allow your customers to be able to use their phones all over the world.
- Provide you with a complete billing system that will give you the ability to offer your customers Pre-pay and Post-pay options.
- Offer your customers voice mail, texting, and data (depending upon your requirements).

As a premier systems integrator of commercial off-the-shelf equipment, ACS Wireless specializes in providing its customers with advanced, innovative, cost effective wireless communications solutions that are modular, flexible and scalable for various applications. Our systems utilizes GSM or CDMA technology and includes a modular architecture that allows for easy node transformation with unlimited scalability to support from a few subscribers up to 20,000+ users as well as expansion of the system's coverage area as needed.

We believe that communication is the great equalizer. A person living in a remote location has just as much right to affordable communication as a person living in a major metropolitan area.

We live by our motto:

"Communication for everyone."
